FOR IMMEDIATE RELEASE

## **Darton Lightning Crossbow** *Features A Noise-Suppression System*

COLUMBUS, Georgia, June 16, 2009 – Realtree Inc.

The Lightning is one the premier crossbow in the market place today boasting a 17 ½" power stroke, which can launch a 475-grain arrow at a blistering 362 fps or a 525-grain arrow at 346 fps (140 Ft-lbs Kinetic Energy). The bow has all the features you expect in a top line crossbow: CNC machined arrow track, Teflon-impregnated barrel rail, a trigger-forward design for better balance and the smoothest trigger available with less than 3 ½ pounds of required pull. All of this is complemented by a noise-suppression system that includes Sims Technology and bowstring noise suppressors attached to the riser to deaden string vibrations. The most noise you hear is your arrow hitting the target.
